Passionate Technical Trainer with a track record of mentoring students from basic concepts to interview readiness, Committed to enhancing problem-solving skills and driving placement success through structured and hands-on Training.

Experience

Technical Trainer	10000coders , Hyderabad	Present
-------------------	-------------------------	---------

Education

[2025]

Sri Krishna Institute Of Technology, Bangalore, Karntaka
Bachelor of Engineering in Computer Science

9.2 CGPA

Technical Skills

Technical Skills:- HTML, CSS, JavaScript, Java.

Deployment:- Github, Vercel

Library:- ReactJS

Databases: MySQL

Tools:- Git and Github,

Operating System: Windows.

VS Code, MySQL Workbench, EclipseIDE.

Internships

SuprMentr - Web Developer Trainer

- Worked as a Web Developer Trainer, providing hands-on instruction in web technologies and guiding trainees in applying coding best practices for real-world project development.

DigiGlobe Solutions - Front End Developer

- Developed a responsive and interactive E-Commerce Website using HTML, CSS, and JavaScript, ensuring a seamless user experience across devices.

Sensors and Sensor Application Development

- Designed and implemented a solution using Arduino UNO and various sensors to monitor baby activity, ensuring safety and comfort through water level and sound detection.

Projects

Front-End Project :- E-Commerce Website (HTML, CSS, JavaScript, ReactJS)

- Developed a fully responsive and interactive e-commerce platform using HTML, CSS, and JavaScript, ReactJS to deliver seamless user experiences.
- Implemented essential features like product search, filtering, and cart management to improve user engagement and navigation.

React Project :- React Admin Dashboard Application(HTML, CSS, JS, Bootstrap, ReactJS)

- React Admin Dashboard Application is a web-based interface used to monitor, manage, and analyze application data from a single platform

Full Stack Project :- McDonalds Website (HTML, CSS, JavaScript, Java, MySQL)

- Developed a responsive and interactive food ordering website using HTML, CSS, JavaScript, Java and SQL to create a smooth and user-friendly experience.

IoT Project :- Smart Baby Cradle Monitoring System(Arduino UNO, Sensors)

- Developed a working prototype that monitors water levels and sound, providing real-time alerts to ensure the baby's comfort and security.

Achievements

- Presented project at StartUp MahaKumbh 2024, Delhi, showcasing innovation in IoT-based solutions.
- Won Inter-College Debate Competition, securing top positions for three consecutive years..

Responsibilities

- Class Representative and Student Coordinator, actively managing student activities and communication between faculty and students.
- Volunteer at Lila Poonawala Foundation, contributing to event organization and community outreach initiatives.
